DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Claim 10 will be amended as follows:

On line 8 of the claim after "absence of", delete --a-- and replace with "an additional"

Authorization for this examiner's amendment was given in a telephone interview with Sandra Shaner on 7/10/06.

Allowable Subject Matter

Claims 10 and 11 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or render obvious wherein measuring a change in impedance magnitude of the PCR solution is performed in the absence of an additional probe (the additional probe being stated because the electrodes can be considered a first probe) for generating an electrical signal and at a predetermined alternating current voltage frequency with an increase in the number of PCR cycles (note: "the number of

PCR cycles” has correct antecedent basis as it is clear that an amount of PCR cycles is being introduced into the claim) and in the combination as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
